

WORKING TARIFF DOCUMENT *of New Zealand*

Replacement Pages – Effective 24 August 2023

Dear Subscriber

Please find enclosed replacement pages to the Working Tariff Document. These replacement pages have been prepared to update the Working Tariff Document – Effective 24 August 2023.

This replacement set covers amendments to the Working Tariff document as a result of:

Tariff (Part II Concessions 80 and 81) Amendment Order 2023, made on 24 July 2023.

The Tariff (Part II Concessions 80 and 81) Amendment Order 2023 came into force on 24 August 2023. It makes minor amendments to some of the conditions relating to concessions 80 and 81 where arriving passengers' baggage and household effects are entered duty free. These amendments are aligned with current practice. This is denoted by the symbol '⌘'.

An error was made in implementing the necessary Working Tariff Document changes required to give effect to the preferential tariff treatment now available under the **UK** NZ FTA. Customs inadvertently also changed the acronym for the country code for import and export entries. This amendment rectifies that error. **GB** should be used when indicating the country of origin of imports from the United Kingdom or country of destination for exports to the United Kingdom. The acronym **UK** is to be used when indicating the preferential tariff treatment being sought when claiming preference for imports from the United Kingdom under the UK NZ FTA. This is denoted by the symbol '➤'.

Christine Stevenson
Comptroller of Customs
